COVID-19 STATISTICS BY REGION*

Source: Johns Hopkins University, HungerMapLIVE analysis
Countries are aggregated according to WFP regions

NOTES:

This snapshot provides daily updates on COVID-19 statistics with a focus on countries where WFP operates and low- and lower-middle income countries, as analyzed by HungerMap LIVE (hungermap.wfp.org). It also provides a daily snapshot of the impacts of the outbreak in countries where WFP's Hunger Monitoring Unit conducts remote near real-time food security monitoring. In light of COVID-19, these systems have been expanded to monitor impacts on households, specifically the access and availability of health care, access to markets and livelihood coping. Data is collected on a rolling basis via live telephone interviews and updated daily. This will help WFP to monitor the situation prior to large scale outbreaks, capture problems in real time and provide the necessary information for early action and mitigation. Covid-19 data valid as of 2020-08-02

TOP 20 COUNTRIES WITH THE HIGHEST DAILY INCREASE IN COVID-19 CASES

	confirmed cases	deaths	(no. of days) for cases to double		
1. Bahamas (7.5 days)	648	14	11. Colombia (17.5 days)	317,651	10,650
2. Gambia (7.8 days)	498	9	12. Venezuela (18.1 days)	20,206	174
3. Papua New Guinea (8.0 days)	110	2	13. Lebanon (18.3 days)	4,885	62
4. Equatorial Guinea (8.9 days)	4,821	83	14. Namibia (18.9 days)	2,294	11
5. Zimbabwe (10.8 days)	3,921	70	15. Angola (19.2 days)	1,199	55
6. Viet Nam (12.3 days)	621	6	16. Suriname (19.2 days)	1,849	27
7. Lesotho (13.3 days)	718	19	17. Guyana (19.3 days)	474	21
8. Libya (13.3 days)	3,837	83	18. Philippines (19.4 days)	103,185	2,059
9. Zambia (13.8 days)	6,347	170	19. Japan (19.6 days)	39,116	1,013
10. Ethiopia (16.6 days)	18,706	310	20. Paraguay (20.2 days)	5,644	52
